

The Teaching Undergraduate Mathematics Seminar II (TUMS II) proudly
presents:

Making the Grade: Evaluation and Assessment

Presented by Thomas Judson and the Preceptor Group

In this case, participants are asked to grade sample student work from a class. They are asked to mark several problems from a given course as if they were questions on an exam, and then as if they were homework problems. During the discussion, participants will see each other's grades and discuss how they arrived at them.

We welcome anyone from the DEAS, Statistics, and
Mathematics Departments who are interested in teaching.

Thursday, November 17, 2005, 2:30 to 4 p.m.
Science Center 706 - Statistics Department Seminar Room
